

## At the end of the PLC session

### Template Module 2: Post-session within the group

#### Post-session:

- ① Each participant uses 5 minutes to silently think back on how they managed to act in accordance with the espoused theories discussed earlier, while the observer tries to sum up and select some evidence of actions/behavior consistent with and contrary to the espoused theories s/he has collected during the PLC meeting to back up his/her feedback to the group. Then the observer presents the main conclusions by giving some examples of actions/behaviors consistent with and contrary to the espoused theories, and how this affected the effectiveness of the meeting.
- ② The group reflects together on the feedback, select some actions or behaviors that were incongruent with the espoused theories and write them in the first box, and discuss the theories-in-use that could underlie these actions/ behaviors (write them in the second box).

actions/behaviors

theories-in-use

- ③ The group reflects together about what to write as successes and/or further practice areas in the memory cards (*the memory cards can be used as a reminder during the next session*):
